EXPERIENCE

Frontend Developer

CV Infotech Pvt. Ltd.

07/2026 – Present

Gurugram (Onsite)

- Implemented automatic latitude and longitude extraction from map links while creating new listings on Pet Friendly Places, simplifying location data entry and improving listing accuracy.
- Implemented listing pagination and city-based filtering to efficiently handle large sets of listings and provide a smoother browsing experience.
- Implemented HTTP-only cookie-based authentication in BoardGlide to securely manage user sessions between the React frontend and backend.
- Developed task creation and employee timer functionality, enabling tasks to be assigned and tracking the time spent by employees on their respective tasks.

EDUCATION

Bachelor of Computer Applications (BCA)

Pacific University, Udaipur

Graduated: March 2024

03/2024

TECHNICAL SKILLS

Frontend

HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Redux, Socket.io, Figma, Web-API'S

Deployment

Vercel, Render, AWS(EC2), Github Actions(CI/CD), cPanel

Tools

Git, GitHub, Postman, AI(ChatGPT, Claude, Gemini)

PROJECTS

ShareMint - Expense Sharing Platform

Tech Stack: React, TypeScript, Redux Toolkit, Tailwind CSS

- Developed a responsive expense-sharing interface for creating groups, recording shared expenses, and viewing member balances.
- Implemented Redux Toolkit for managing authentication, group, expense, and user-related application state.
- Built reusable React components and integrated REST APIs to handle group, expense, and user workflows.

ChatFlow - Real-Time Chat Platform

Tech Stack: React, TypeScript, Redux Toolkit, Tailwind CSS, Socket.IO

- Developed a responsive real-time chat interface using React and TypeScript for live one-to-one messaging.
- Implemented Redux Toolkit for managing conversations, messages, users, and chat-related application state.
- Integrated Socket.IO on the frontend to receive and display messages in real time, providing smooth chat updates without page refreshes.
